EXPERIENCE

Sr. UX Designer

Littelfuse, Inc. | Jun 2023 – March 2025

- Defined requirements and developed a strategic roadmap for new features and major redesigns
- Designed over 100 high-fidelity prototypes in Figma for product pages, landing pages, and other user flows with a focus on user-centered and mobile responsive design
- Leveraged usability testing, observation, analytics, and heuristic evaluations to validate improvements
- Collaborated cross-functionally with Project Managers, Business Analysts, Engineers, and Stakeholders to deliver scalable UI components that enhance platform efficiency
- Conducted accessibility audits and localization reviews for WCAG, CCPA/CPRA, and GDPR compliance
- Worked closely with marketing to update brand materials, including style guides and design systems, to maintain consistency
- Supported training activities by leading documentation efforts and providing walkthroughs during group seminars and 1-on-1 sessions for content, asset, and product management systems
- Led 10+ contractors and team members, boosting project outcomes and strengthening team dynamic

UX Developer

Calibre Scientific, Inc. | Jun 2022 – Oct 2022

- Redesigned the 7-page Investor Relations site, improving accessibility, navigation, and responsiveness—successfully moving from concept to production within 3 months
- Analyzed previous site version to determine user needs and pain points to restructure information architecture, reducing bounce rates and improving session durations
- Partnered with marketing to refine brand consistency across multiple digital assets and coordinated with another developer to implement designs

Software Engineer II

Accolade, Inc./2nd.MD | July 2019 – July 2022

- Gathered and translated stakeholder requirements into detailed wireframes and prototypes using Figma for web and mobile applications with clearly defined user stories and technical specifications
- Worked closely with mobile developers to verify designs met mobile standards, including iOS and Android guidelines, responsiveness, and accessibility best practices
- Managed accessibility project, performing audits and eliminating all found violations, achieving successful VPAT certification and conformance to WCAG 2.0 AA standards
- Led UX research efforts to inform design improvements, meeting business goals and user needs
- Developed features using HTML, CSS, JavaScript, Vue.js, PHP, and SQL to enhance product functionality
- Collaborated with CIO, CTO, 3 project managers, 2 business analysts, 2 product owners, 11 developers, sysadmins, 2 database architects, cyber security and other teams

Digital Specialist

Weatherford International | Aug 2017 – Feb 2019

- Designed and developed interactive tools for 30+ international marketing and sales campaigns including web and mobile applications
- Spearheaded a site redesign project using Kentico CMS, enhancing user experience and lead generation
- Analyzed campaign effectiveness through analytics, heatmaps, and user feedback and using data to iterate design cycle and improvements
- Managed and mentored 2 interns, fostering professional growth through guidance and feedback while enhancing team cohesion and collaboration

Visual Designer

ServerMonkey.com, LLC | July 2014 – Aug 2017

- Designed responsive web pages and sites using interactive wireframes and prototypes, driving a significant increase in user engagement
- Developed features, pages, and new sites using Bootstrap, JQuery, and LESS
- Enhanced SEO and product page performance through detailed analytics and A/B testing, increasing organic traffic by 15%, securing top rankings in 3 competitive keywords, and reducing bounce rates by 30%

EDUCATION

B.S. in Digital Media, eMedia; Minor in Organizational Leadership and Supervision

University of Houston | May 2016

Certifications

- Foundations of UX Design, Google/Coursera
- Advanced Google Analytics, Google Analytics Academy
- Lean Six Sigma Yellow Belt, University of Houston
- Full Stack Development, Computer Software Engineering, Codecademy

SKILLS

Product Design

Principles & Strategy: Accessibility, Responsive Design, Information Architecture, User Empathy, Data-Driven Design, Design Systems and Component Libraries

Wireframing & Prototyping: Adobe CC, Figma, Axure, Miro, Lucidchart

Research: Heuristic Evaluation, Usability Testing, User Interviews, Observation, Surveys, Personas, Journey Mapping, A/B Testing, Competitive Analysis

Project Management

Roadmapping: Requirements Gathering, Prioritization, KPIs and Goal Setting, Detailed Task Definition, Streamlined Communications, Stakeholder Management

Productivity Tools: Jira, Confluence, Trello, Zendesk, Asana, Ivanti

Methodologies: Agile, Scrum, Waterfall, Kanban, Design Sprints

Marketing Data Analysis

Web Analytics & SEO: Google Analytics/Tag Manager, Mixpanel, Kissmetrics, Hotjar, Screaming Frog

Marketing & Sales Automation: HubSpot, Pardot, Salesforce

Engineering

Languages & Technologies: HTML, CSS, Javascript, Java, PHP, SQL, git, version control

Frameworks: Bootstrap, JQuery, Vue.js, Tailwind, LESS/SASS, Storybook

ADDITIONAL

Languages: Fluent in Mandarin Chinese, Currently learning Vietnamese and Spanish

Community Involvement: ADPList member, AIGA Houston volunteer mentor

Interests: Snowboarding, Pickleball, Gymnastics, Yoga, Dogs, Lettering & Typography, Baking

Work Eligibility: Eligible to work in the U.S. with no restriction
